

Business Partner

Brief Introduction

Mastering : GT (GITI) Radial Tyre Information

GITI Tyre was started from Indonesia and expanding its business network to China and now China is the biggest manufacturer of tyres and is **ranked #5** in the world of radial truck tyre production.

GITI export to over **100 countries** world wide. In Europe the GT Radial brand has gained rapidly a high market acceptance for delivering **excellent cost per kilometer** coupled with high reliability and retreadability.

"All the tyres for trucks, cars and light transport made by GT Radial for export to countries on the Old Continent **conform to EU directives and standards**. The development of product design and manufacturing technologies rests, first and foremost, on the work of over 300 engineers in the R&D centres in China, Indonesia and Great Britain".

The latter is the European Technical Centre (ETC) situated near Birmingham at the headquarters of MIRA (Motor Industry Research Association), an independent international body for automotive development and testing that was originally set up by British car manufacturers with the support of the government; its numerous structures frequently host tests by leading tyre manufacturers as well as tests on prototypes, military vehicles and even Formula 1.

Mastering : Product Range

We are offering different product range to suit for the market demand:

- Tyre size : R13 to R24 sport car's rim size
- Vehicle type: Sedan car, sport car, van, MPV, SUV, truck & ORV
- Quality: Tested with Audi TT, Volkswagon GTi, BMW, Myvi, Proton cars

Self-Sealing Safety (SsS) Tyre For Truck/Lorry/Bus

Mastering : Truck/Lorry/Bus

 PCR, SUV & Light Truck	 Commercial VAN	 Truck & Bus			
PRODUCT RANGE	 Long Haul	 Regional	 Mixed Services	 Urban	
	 STEER	 GT269	 GT279	 GT288	
	 DRIVE	 GT679			
	 TRAILER	 GT279	 GT979	 GT988+	

Mastering : Truck/Lorry/Bus Tyre (I)

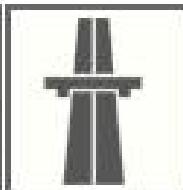

GT679

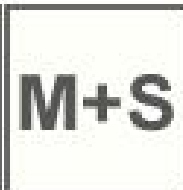

Non directional drive axle pattern designed to deliver exceptional traction and outstanding mileage performance

Drive

Long Haul

M+S Mark

- Reduced noise emissions, good all season traction with improved resistance to heel and toe

LARGER IMAGE 

MORE DETAILS 

Mastering : Truck/Lorry/Bus (GT 679)

Non directional drive axle pattern designed to deliver exceptional traction and outstanding mileage performance

OVERVIEW

Features

Non directional low void ratio block pattern with open shoulder and sidewall protector ribs

Benefits

➤ Reduced noise emissions, good all season traction with improved resistance to heel and toe

GT679 Physical Attributes

 Load Index	 Max. Load	 Tread Depth
126/124 - 156/151	1700/1600 - 3750/3450 (Kg)	14.5 - 20.2 (mm)

Mastering : Truck/Lorry/Bus Tyre (II)

GT659

Directional drive axle pattern provides high level of performance in regional applications

- Extended tread life
- Deliver a smooth and consistent wear
- Efficient traction on wet and dry roads

LARGER IMAGE 

MORE DETAILS 

Mastering : Truck/Lorry/Bus Tyre (III)

GT688

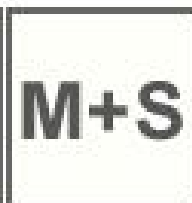

Aggressive block pattern drive axle tyre flexible in a variety of applications

Drive

Regional

M+S Mark

- Good self cleaning properties with improved resistance to tread tearing, heel and toe wear and curbing and impact damage

LARGER IMAGE 

MORE DETAILS 

Mastering : Truck/Lorry/Bus Tyre (IV)

GT879

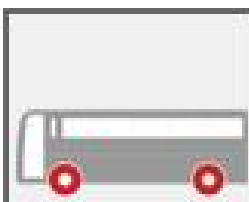

Flexible in a variety of applications, available in both M rated for steer and J rated for trailer positions

Steer

Trailer

All position

Regional

- Provides excellent stability and mileage performance, optimal tyre footprint for more even wear

GAL811 COACH

New specially designed long haul coach pattern delivers a quiet and comfortable ride

- A combination of comfort and robustness is achieved through the utilisation of two different bead fillers
- Delivers improved abrasion resistance and a lower fuel consumption
- For the optimal tyre footprint and equal force distribution resulting in improved control and more even wear
- Ensures efficient water evacuation for improved grip and braking in wet conditions

Mastering : Product Warranty

For One-to-One Exchange Only Covers With:-

- Manufacturing defect
- Tyre tread surface area
- Hole size not more than 5mm
- Same hole able to stand for 20 times punching
- Lifespan for Nano Macromolecule is 5 years
